

AUTOMATE YOUR LIGHT

Crestron Integrated Lighting & Shades

When it comes to your home and your life, you don't settle for anything but the very best. You want everything to be complete, easy, and worry-free. That's what you get with Crestron.

Crestron lighting control and motorized shading solutions give you precise, super-quiet, one-touch control of electric and natural light. They add beauty, convenience, and comfort to your home. Even better, they lower your utility bills and increase the value and security of your home.

Combined with our advanced entertainment, climate, and security controls, you can control everything in your home anytime, anywhere, from elegant touch screens, keypads, and remotes or from your favorite smart devices.

Why add Crestron lighting and shading control to your home?

- Convenience
- Energy Savings
- Aesthetics
- Security
- Protection

Control lights, shades, climate, entertainment, and security from one simple touch screen or keypad.

CONVENIENCE

Manually raising and lowering a shade is easy enough. But what if the shade is very large and heavy? What if there are two, three, four, or more shades to operate and they're located all over your house? What if there are lights on throughout the house? Wouldn't you love to be able to turn off all the lights and adjust all the shades with the push of a single button as you're rushing out the door? How about a "Bedtime" button that would set all the lights and shades throughout your home according to your nighttime needs? You can, with Crestron.

Motorized shades and draperies are ideal for homes with:

- Large windows
- Many windows
- Skylights
- Second-story openings
- Windows blocked by furniture

Properly installed shades with opaque fabric doubles energy efficiency and reduces heat loss by 50%.

ENERGY SAVINGS

Automated lighting and shading systems translate into year-round savings on electrical, heating and cooling costs. As much as 50% of home heating and cooling energy can be lost through its windows, adding up to 25% to heating bills and as much as 75% to air conditioning bills.

Shades and draperies provide insulation and manage solar heat gain – allowing more warmth from the sun when you want it, or block it out when you don't. Waiting for the room to get too hot or cold drives up costs too. Automated shades can raise or lower based on time of day, room temperature, occupancy or season.

Use daylight to illuminate rooms rather than electric lights to further reduce energy and lower utility bills. Crestron intelligently balances room temperature and lighting to create optimal comfort, convenience and savings.

We don't just add technology to your home;
we simplify all the technology that's already there.

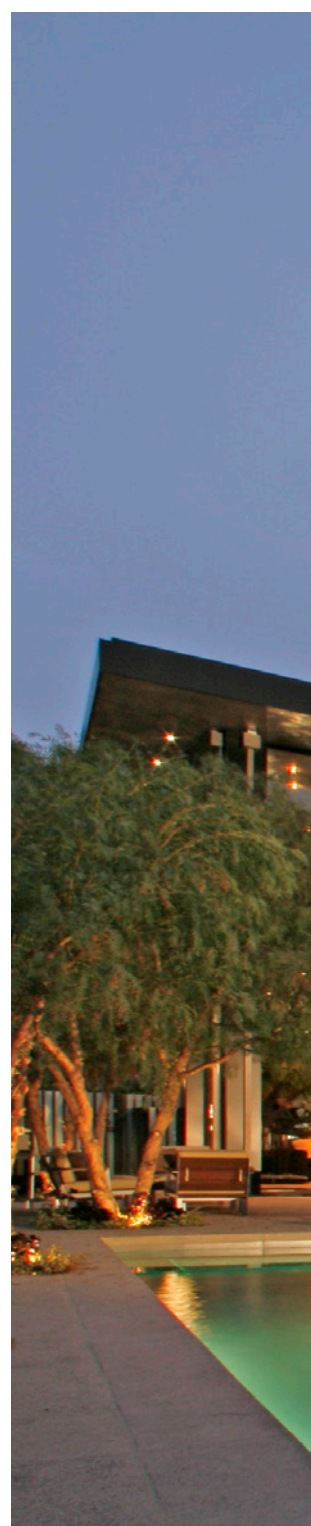

AESTHETICS

You know those unsightly clusters of wall switches and dimmers all over your home? You can replace them with one sleek in-wall touch screen or an elegant keypad, complete with back-lit engraved buttons for easy identification and use.

Have a room with a view? Crestron shades serve a dual purpose; they enhance views and provide privacy. Also, motorized shades and draperies eliminate unsightly cords and open magically, giving you beautiful, unobstructed views.

Integrated lighting and shading automation isn't a luxury; it's a necessity.

SECURITY

There's no question that automated lighting and shading discourage potential intruders. By automatically turning lights on and off and raising and lowering shades at preset times your home becomes more secure. Being able to control your lights and shades from anywhere, anytime gives you greater peace of mind when you're home, too. Right from your bed, you can turn on all the lights inside your home in the middle of the night if you hear a suspicious noise.

Shades and draperies can block 100% of harmful UV rays, reflect 75% of solar radiation, and still let in light.

PROTECTION

Shades block damaging UV rays, protecting your valuable furniture, artwork, and flooring from fading. They also control annoying glare and reflections on computer displays and TVs.

Nothing compares to the dramatic impact of one-button activating an entire room: shades, lights, music and more.

LIMITLESS CONTROL

Think about the ease of simultaneous push-button operation of an entire room of window treatments and lights! Even better, with Crestron, your control options are limitless: from the same remote control you use for your home theater, entire lighting and shading scenes can be customized to your preference. You can also control your home settings from any location using the Crestron app on your smartphone or tablet.

Crestron: The total home automation package

Lighting and shading control is great. The power to control everything in your home is even better.

Crestron can integrate all of the systems and devices in your home so they can communicate and work together intelligently.

With Crestron home automation you'll enjoy greater comfort and convenience throughout your home. Using our stylish keypads, in-wall and tabletop touch screens, or your favorite smart device, you can easily control everything, room-by-room:

- | | | | |
|---------------|--------------|----------------|----------------------|
| ■ Lights | ■ Shades | ■ Security | ■ Personal computers |
| ■ Temperature | ■ TVs | ■ Door locks | ■ Appliances |
| ■ Humidity | ■ Music | ■ Home theater | ■ Video games |
| ■ Saunas | ■ Fish tanks | ■ Pool | ■ Hot tubs |

How will Crestron improve your life?

Your life, family, and home are unique. Unlike “one size fits all” solutions, a Crestron system is infinitely customizable to blend with your lifestyle.

- Unified, simplified control of everything in your home
- Peace of mind, knowing that all technology in your home is intelligently controlled, maximizing your comfort, convenience and energy savings
- Everyone in your family can enjoy the entertainment they want, whenever and wherever they want
- See what's going on in your home at all times – even when you're away
